PROJECT EXPERIENCE

E-Commerce Workflow Management System

Project Title: Dynamic E-Commerce Workflow Management (Capstone 2 and Capstone 3)
Role: Zuit student (Frontend and Backend Developer)

Project Link: [Backend API](#) [Frontend](#)

Description:

- Developed a full-featured e-commerce platform using the MEVN stack (MongoDB, Express.js, Vue, Node.js). The platform includes essential functionalities to enhance user experience and streamline the management of online sales. Created and optimized multiple pages, ensuring seamless integration and high performance.
- The platform features dynamic product catalog with filtering and sorting, real-time search, seamless cart updates, secure checkout, and a comprehensive admin dashboard with real-time analytics and user management capabilities.

Fitness Tracker Application

Project Title: App Building API 1 and FS 1
Role: Zuit student (Fullstack Developer)

Project Link: [Backend API](#) [Frontend](#)

Description:

- Architected an intuitive, full-stack Fitness Tracker Application using the MEVN stack (MongoDB, Express.js, Vue.js, Node.js) with a fully responsive layout for all device sizes.
- Built a scalable RESTful API and MongoDB schema optimized for efficient data storage, retrieval, and state management of user fitness metrics.
- Deployed a decoupled production environment, hosting the backend API on Render and the frontend client on Vercel to ensure optimal load times and reliability.

RAUEL GUIMMAYEN

SKILLS SUMMARY

Programming and Web Development

- Front End Web Development: HTML5, CSS3, Bootstrap, Tailwind, Wireframes and Mockups, Git and GitHub
- Back End Development: JavaScript, MongoDB, Node.js Express.js, Postman, AWS Lambda
- Full Stack Development: Vue.js, Composition API, Options API, Vue Router, Pinia, Axios, Responsive web app, and Web Design, Vercel, Render

IT Helpdesk/Service Desk Analyst

- Active Directory & User Account Management
- Microsoft Office 365 Administration and Microsoft Entra Administration
- Remote Desktop Support & Remote Troubleshooting
- Computer Hardware Troubleshooting, Software installation and upgrades

WORK EXPERIENCE

11/04/2021 - 01/30/2026

Netrix Global Philippines, Cebu City, Philippines

Service Desk Analyst

- Provided first-line support resolving more than 20 tickets per shift.
- Delivered remote support to users for software, hardware, access, and network issues.
- Processed new hire and termination service request, using Active Directory, Office 365 admin center and Entra admin center.
- Collaborated with IT security team to identify and mitigate potential security threats.
- Escalated complex problems to senior technicians, facilitating timely and effective solutions.

01/28/2019 - 06/23/2021

CT4 Philippines Inc., Cebu City, Philippines

Support Engineer

- Managed user account lifecycle for employees from for over 20 company clients using Active Directory.
- Used Office 365 Microsoft Partner Center to create Office 365 account for CT4 clients.
- Used the following to monitor and manage Virtual Machines: VMware vCenter Server, Citrix Studio, and Citrix Director.
- Used Veeam Backup and Replication to implement and monitor backup and replication jobs for Virtual Machines that we manage.
- Used ConnectWise as ticketing system to record worklogs on everyday tasks.

Movie Application

Project Title: App Building API 2 and FS 2

Role: Zuit student (Fullstack Developer)

Project Link: [Backend API](#) [Frontend](#)

Description:

- Developed a responsive, full-stack Movie Catalog Application utilizing the MEVN stack (MongoDB, Express.js, Vue.js, Node.js) featuring full cross-browser compatibility.
- Engineered a RESTful API and database schema in MongoDB to store movie data and support an interactive, multi-user commenting system.
- Implemented secure role-based access control (RBAC), restriction-free browsing for users, and exclusive CRUD capabilities for administrators to manage the movie catalog.
- Optimized application deployment by hosting a decoupled architecture, leveraging Render for the backend API and Vercel for fast frontend delivery.

Blog Application

Project Title: App Building In-Class

Prototyping

Role: Zuit student (Fullstack Developer)

Project Link: [Backend API](#) [Frontend](#)

Description:

- Architected a full-stack, responsive Blog Application utilizing the MEVN stack (MongoDB, Express.js, Vue.js, Node.js) with cross-browser and cross-device compatibility.
- Engineered secure user authentication and authorization pipelines, implementing granular role-based access control (RBAC) for standard users and administrators.
- Designed and implemented RESTful APIs supporting complete CRUD operations for managing blog posts, user profiles, and dynamic commenting systems.

EDUCATION

March 2026 – June 2026 | ZUITT TECH PROGRAM

Main Course Package (MEVN)
Full-stack Web Development

June 1994 – March 1999 | Laguna College of Business & Arts, Calamba City
Laguna
BS Computer Engineering

OTHER SKILLS

- Time Management & Priority Triaging
- Adaptability & Continuous Learning
- Cross-Functional Collaboration
- Ownership & Accountability

12/12/2015 – 08/04/2018

ATOS Information Technology Inc., Cebu City, Philippines

System Lead Technician

- Served as the primary Tier 2 escalation point, rapidly diagnosing and resolving complex hardware, software, and network issues routed from Tier 1 to minimize employee downtime.
- Spearheaded remote onboarding deployments, guiding new work-at-home employees through the end-to-end setup of dual-monitor workstations, peripherals, local/network printers, Avaya telephony, and secure Cisco/Fortinet VPN connectivity.
- Administered endpoint configuration and software compliance, handling computer renaming protocols, enterprise printer driver deployments, and software license transfers in accordance with corporate policies.

11/04/2014 – 12/04/2015

XEROX BUSINESS SERVICES PHILIPPINES, INC., Cebu City, Philippines

Technical Helpdesk Analyst

- Resolved Tier 1 technical hardware and software issues across phone and ticketing channels, consistently meeting or exceeding established performance metrics.
- Provisioned end-user devices by managing hardware configurations, software installations, and system updates for seamless deployment.
- Triageed and categorized high-volume incoming tickets, accurately routing complex issues to Tier 2/3 teams to ensure strict compliance with SLA (Service Level Agreement) targets.

05/09/2011 – 09/02/2013

CONVERGYS, Mandaluyong City, Philippines

Licensing Engineer

- Administered end-to-end license generation and fulfillment for a portfolio of over 200 Cisco products, including Catalyst switches, ISR/ASR routers, Wireless LAN Controllers (WLC), Firepower Firewalls, and Cisco Unified Communications Manager (CUCM).
- Diagnosed and resolved complex licensing discrepancies, including Product Authorization Key (PAK) validation failures.
- Collaborated within Cisco Global Licensing Operations (GLO) to streamline internal provisioning workflows, reducing ticket resolution time for critical enterprise accounts

11/04/2010 – 05/06/2011

CONVERGYS, Mandaluyong City, Philippines

Technical Support Representative

- Diagnosed and resolved complex technical issues involving AT&T Fiber, broadband connections, and Wi-Fi gateways, consistently.
- Troubleshooted hardware and peripheral configurations, including AT&T modem/routers.
- Successfully de-escalated billing and service complaints from frustrated accounts, turning critical situations into positive service interactions and boosting customer retention.
